

**Figure 1**

The diagram illustrates a clinical trial flow. At the top, a box labeled "Patient" contains the text "Condition". An arrow points from this box down to another box labeled "Response to Treatment". Below this, there are two more boxes: "Response to Treatment" and "Outcome". An arrow points from the "Response to Treatment" box down to the "Outcome" box. A feedback loop arrow points from the "Outcome" box back up to the "Response to Treatment" box.
